

Top-quality sound in a pocket-sized package: the CX 6 Travel and MM 80i Travel from Sennheiser

Wedemark, 1 July 2010 – Long journeys seem much shorter with good music or an exciting film – especially when you can listen in perfect peace without background noise. This luxury is guaranteed by the familiar CX 6 Travel earphones and the new MM 80i Travel headset version, which has been specially developed for the iPhone*. Both models combine top-quality Sennheiser sound with the very high passive noise attenuation of compact ear canal earphones, ensuring relaxed listening on planes and trains. The MM 80i Travel headset version has been part of the Sennheiser Travel Line since July.

“The CX 6 Travel and the MM 80i Travel will fit into even the smallest bags,” explains Product Manager Christian Ern. “These are real high-end ear canal earphones that offer powerful bass and a detailed, lifelike sound and provide excellent attenuation of background noise. The two compact travel models are the perfect companion for frequent travellers.” Both headphones come with a selection of six ear-fit rings to ensure that they optimally adapt to the shape of the ear canal, guaranteeing a perfect fit to

provide a high passive noise attenuation.

Made for the iPhone

The headset version of the ear canal phones combines superb sound with a convenient hands-free system. The microphone and control unit are integrated into the cable and allow the Apple iPhone and other Apple products to be effortlessly controlled at the push of a button. “A wide variety of functions can be controlled with a single button. Depending on how often and how long the button is pressed, music and videos can be played paused or skipped to the next/previous track,” explains Christian Ern. The control unit can also be used to answer, end or reject telephone calls and to activate the

Voice Control function. A particularly useful apple feature: the music is automatically paused during a phone call. This enables you to seamlessly switch between listening to music and telephoning while you are travelling, making sure that you never miss an incoming call or your favourite song.

The headset version of the successful CX 6 Travel headphones is compatible with iPhone 3G, iPod nano (4th and 5th generation), iPod touch (2nd generation), iPod classic (120GB/160GB), iPad, and 2009 models of Macbook, Macbook Pro and Mac Pro. Voice Control is supported by iPhone and latest iPod touch.

Everything included

Another unique feature is the plug adapter. It can be used to convert a straight stereo jack plug quickly and easily into a right-angled jack plug or a double mono jack plug. This allows the headphones to be optimally connected to portable players and all types of in-flight entertainment systems. At the same time, the adapter adjusts the impedance of the travel headphones, which is often much higher in in-flight entertainment systems than in mobile devices. "This adapter ensures that the CX 6 and the MM 80i Travel provide perfect sound from all sources, whether it is an MP3 player, an iPhone or in in-flight entertainment system," explains Christian Ern.

In addition to the plug adapter and the ear-fit rings made of silicone and foam, the earphones also come with a protective carrying case, a cable clip, a cleaning tool and clip-on ear hooks.

The new MM 80i Travel will be available from the end of July in Apple Stores and Apple Online Shops and from Sennheiser sales partners.

The Sennheiser Group, with its headquarters in Wedemark near Hanover, Germany, is one of the world's leading manufacturers of microphones, headphones and wireless transmission systems. The family-owned company, which was established in 1945, recorded sales of around €390 million in 2009. Sennheiser employs more than 2,100 people worldwide, and has manufacturing plants in Germany, Ireland and the USA. The company is represented worldwide by subsidiaries in France, Great Britain, Belgium, the Netherlands, Germany, Denmark (Nordic), Russia, Hong Kong, India, Singapore, Japan, China, Canada, Mexico and the USA, as well as by long-term trading partners in many other countries. Also part of the Sennheiser Group are Georg Neumann GmbH, Berlin (studio microphones and monitor loudspeakers), and the joint venture Sennheiser Communications A/S (headsets for PCs, offices and call centres).
