

# Cell Phone Compatibility

Via an audio cable, you can connect a mobile telephone to the following aviation headsets from Sennheiser:

- **HME 95**  
(audio cable is included in the delivery)
- **HMEC 250 \***  
(audio cable is included in the delivery)
- **HMEC 460 \***  
(audio cable is included in the delivery)
- **HMEC 46-BV-K \***  
(audio cable is available as an accessory; for details, please refer to the user manual of the headset)

## Suitable mobile telephone models

So far the following mobile telephone models have been tested and found to operate correctly with the headsets:

### LG

- VX8300

### Motorola

- All models

### Sony Ericsson

- K 700i
- T 610

### Sprint

- Pocket PC 6700

This list is continuously updated as new mobile telephones are successfully tested. Sennheiser cannot make a binding declaration with respect to mobile telephones which have not yet been tested.

## Connecting a mobile telephone (see A)

The 2.5 mm jack socket ① allows you to connect a mobile telephone. For this to function correctly:

- the headset microphone connector must be connected to the aircraft radio/intercom,
- the aircraft intercom/radio must be powered and switched on,
- on headset models with the NoiseGuard™ active noise compensation (marked \* above) NoiseGuard™ must be switched on.

### CAUTION! Danger of accident due to reduced attention!

Making telephone calls or operating the mobile telephone limits your attention and may cause accidents.

During flight operation, do not use the headset for telephone calls!

- ▶ Connect the audio cable to the 2.5 mm jack socket ① on the operating control and to the corresponding jack socket on your mobile telephone ②.

You can adjust the volume of the mobile telephone via the headset's operating control. However, the functions of the mobile telephone cannot be controlled via the headset's operating control.

- ▶ Operate your mobile telephone as usual and observe the instructions of the manufacturer.

## General notes (see B)

Not all mobile telephones feature a 2.5 mm jack socket. We therefore recommend that you purchase a suitable adapter ③ from a specialist mobile telephone accessory retailer. Sennheiser does not accept responsibility/liability for the suitability, function or incorrect function of these adapters. Sennheiser does not accept liability for damage arising from abuse or misuse!
